ABSTRACTED-PUB-NO: JP11231850A

BASIC-ABSTRACT:

NOVELTY - The display unit (1) displays image data sent from the computer and memory stores image data for screen protection. A controller (4) of the unit displays the stored image data for screen protection only when low power consumption exists in information processor.

USE - In personal computer system.

ADVANTAGE - Screen saver function is started separately for a display unit. Therefore a low power consumption is obtained. DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of image displaying unit with screen saver. (1) Display unit; (4) Controller.
